In-Wall & Remote Control

The SWA401 is a high efficiency, high output power audio solution that features an In-Wall amplifier and control surface, and is the perfect complement to interactive whiteboards or interactive flat panels.

The SWA401 is ideally suited to the education and corporate environments where high definition audio is a must-have; or where audio is poor and needs to be improved in a cost-effective way. It features two 3.5mm stereo inputs and a USB socket that has two functions; it can be used as a USB 5v charging output (for mobile, tablet and other portable devices), or for audio playback from flash drive - controlled from the remote control. Three year warranty as standard.

Three Digital Signal Processing (DSP) settings allows for exceptional audio reproduction making it versatile enough to use in small to large classrooms, meeting rooms and large halls.
