Windows collaboration displays by Avocor enable Microsoft 365 at room scale for enhanced teamwork. The WCD by Avocor features a single-cable connection for seamless laptop pairing, while advanced monitoring data improves facilities and meeting ROI. The new collaboration displays are fully compatible with Windows 10 and offer a first-ever single-cable solution that solves the frustrating and often time-consuming problem of connecting devices and people in meetings. The new Windows collaboration displays by Avocor make it simple for teams to connect in a huddle space, across the conference table or even across the globe, allowing them to work together seamlessly and get more done.

## Get meetings started, quickly

The single-cable solution that immediately and intelligently connects a Windows PC to the display, and enables immediate control of the new camera and mic for video and audio, as well as provides hard-wire ethernet connection, power and USB touch-back to the laptop.

## Enjoy ultimate collaboration

Connect and engage with colleagues regardless of location through the integrated, premium conference camera and stereo speakers. The active, far-field microphone array allows the display to connect with a variety of Unified Communications based software, delivering the ultimate audio experience.

## Incredibly responsive with pixel-perfect touch

Windows collaboration displays designed and built by Avocor combine crisp 4K resolution with 20-point touch to offer exceptionally responsive and pixel-perfect touch.

## Connect to the cloud

Built-in sensors that connect to Azure IoT Digital Twins, so IT and facility managers can utilize the environmental data such as room presence and temperature, allowing for real-time adjustments as well as future room / investment planning.
