

Sapphire Dedicated in-Ceiling Screen

Outstanding in it's class

Sapphire are pleased to announce our new range on In-ceiling screens. These will replace the dressing kits that are now discontinued.

Stylish and refined they will grace any environment where a discrete screen is required.

Viewing Area	Product Code	Format	Side Border	Bottom Border	Top Border	Case Dimensions

They come with the Sapphire legendary 3 year warranty and many extras are included which other manufacturers charge for - such as 12V trigger controls or radio remotes

Made with such care and attention it is shame to hide it in the ceiling!

- When fitted you will hardly notice the screen other than a very smart ribbed aluminium profile edged by a stylish curved end panel at each side of the screen. As it is all white it will blend in with most ceilings.
- Can be fitted to standard plasterboard ceilings (subject to the joists being suitable) or build into suspended ceiling structures.
- Comes with a 3m four core electrical lead and a control box with radio controlled remote as standard.
- The box also has a connection to plug in the included 12V trigger lead if your projector has a 12V out socket (3.5mm male required).
- Can be used with the optional Sapphire STR wireless trigger system (subject to modification of the control box used).
- The screen is very easy to install in most environments.
- The fabric is triple laminated glass fibre with black borders for improved viewing experience.
- All fabric is 4:3 ratio with 16:9 and 16:10 having large top borders which can be adjusted to suit your needs.
